Zebra® RZ™ Series RFID Printer/Encoders

SEE MORE. DO MORE.

RFID Industrial/Commercial Printer/Encoders

The RZ400[™] and RZ600[™] printer/encoders bring UHF RFID capabilities to Zebra's popular Z Series® platform and set the new standard as the price-performance leaders in RFID smart labeling. Newly enhanced, they can print/ encode small labels for today's closed-loop item-level tracking applications, as well as help meet global RFID tagging compliance initiatives. These metal printer/ encoders offer EPC UHF Gen 2. Class 1 support; high-speed print throughput; and rugged reliability to enhance productivity in tough environments.

Better Connected for a Connected World

The RZ series RFID printer/ encoders connect easily with most warehouse/manufacturing and business applications. The RZ400 and RZ600 are better connected to your network—through USB 2.0, 802.11b/g secure wireless or Ethernet. They're better connected to your applications—with multiple RFID power settings to adjust to current and future RFID protocols. transponder designs and sizes; choice of print resolution including 300 dpi; and XML-Enabled printing as a standard feature. And they're better connected to your needs with easy setup via a large, easyto-read front panel that includes Asian-language support; easy loading of supplies; and easy maintenance with quick-changing printheads and platens.

Ideal for These Applications

The industrial/commercial RZ400 (for smart labels up to 4 inches) and the RZ600 (for up to 6-inch smart labels) have been designed for item-, case- and pallet-level identification. Streamline business-improvement and supply-chain management applications such as:

Item-level tracking for package verification, work in process, product authentication, document tracking and more
